

The writing triplets

Your writing paper requires you to be able to write in different ways. The triplets are simply sets of 3 styles of writing that you need to be able to use. You may find that the writing tasks set for you to do are asking you to use several different writing styles at once.

For example:

- if a task seems to be asking you to write a story, you may also be using *descriptive* writing at the same time
- if the task asks you to advise somebody about something, you may find that you are also *informing* them
- If you are exploring ideas you may be *imagining* at the same time

You should know how to write to:

Argue/persuade/advise

Analyse/review/comment

Inform/explain/describe

Explore/imagine/entertain
