

## **Catch- up funding**

Following the time out of school, owing to the Covid-19 pandemic, SFA recognises the need to accelerate learning for students, especially those who are disadvantaged. Using our POS statements and departmental trackers we work to identify specific gaps and then close them using targeted intervention, whether one to one or small group programmes.

Barriers to future attainment have been identified which includes social, emotional and academic progress following lockdowns.

Additional funding will be used to support students from Y7- Y13 with targeted intervention and masterclasses after teachers and departments have diagnostically identified gaps.

All teaching staff will run P7 nine sessions which allows for acceleration for students in all year groups where it is necessary.
